DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group I (claims 1-11) and species D (claims 4, 15 and 23) in the reply filed on August 18, 2009 is acknowledged.
2. Claims 12-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 18, 2009.
3. Claims 1-3 and 5-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 18, 2009.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Eguchi et al. (US 2003/0197156) in view of Herrmann et al. (*Electronic structure of Si and Ge gold-doped clathrates*).

Regarding claim 4, Eguchi discloses a clathrate compound comprising a basic structural unit constructed from Ge [0082], including doping and substitution atoms comprising Au, Ba, Ga [0087-0088, 0091-0092].

Eguchi does not disclose composition formula $\text{Ba}_x\text{Au}_y\text{Ga}_{6-f}\text{Ge}_{40}$ ($0 < f < 6$). Herrmann discloses conductivity (P13245/C1/Pa1-2) is a variable that can be modified, among others, by adjusting amount of dopants and substitutions, with said conductivity increasing as amount of dopants and substitutions are increased, the precise amount of dopants and substitution would have been considered a result effective variable by one having ordinary skill in the art at the time the invention was made. As such, without showing unexpected results, the claimed amount of dopants and substitution cannot be considered critical. Accordingly, one of ordinary skill in the art at the time the invention

was made would have optimized, by routine experimentation, the amount of dopants and substitution in the apparatus of Eguchi to obtain the desired conductivity (*In re Boesch*, 617 F.2d. 272, 205 USPQ 215 (CCPA 1980)), since it has been held that where the general conditions of the claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. (*In re Aller*, 105 USPQ 223).
